Experience

Software Engineer III (Senior)
Fabric - Brooklyn, NY - Sep 2019 - Present
- Replaced 3+ year old hand rolled authorization code with AWS Cognito on team of 2 within 1 quarter. Interfaced with existing authorization system. Launched with 30 minutes of downtime and delivered seamless migration to thousands of customers.
- Implemented new insurance product to market within 1 quarter on team of 4. Involved integrating with numerous third parties and strict insurance regulations.

Software Engineer II (Mid)
Fabric - Brooklyn, NY - Nov 2018 - Sep 2019
- Created underwriting workbench, first internal facing product. Required restricted access across multiple roles for remote users and precise math on team of 4. Architected and implemented authorization and authentication with AWS Cognito alone.
- Participated in the sourcing and hiring of 3 Junior and Mid level engineers. Screened resumes, and conducted initial screening interviews while representing the company at hiring events. Organized an Q&A and Open House hiring event in the office for 30 boot camp students
- Proposed and Created D&I initiatives: D&I lunch group, book club, Fabric Ladies Lunch. Appointed to D&I Group Liaison by executive leadership.

Software Engineer I (Junior)
Fabric - Brooklyn, NY - July 2017 - Nov 2018
- Appointed Engineering representative for creation of internal component library.

Teaching Fellow
Fullstack Academy - New York, NY - April 2017 - July 2017
- Mentored and provided troubleshooting assistance to 20+ students.
- Taught algorithm practice problems to students.

Speaking

Weekly Live Coding Twitch Stream
twitch.tv/illuminatedspace - Nov 2018 - Present
Educational coding stream every Saturday morning. Have streamed to over 100 concurrent viewers. Proud member of The Live Coders team.

Recursive Promise Chains or Around the Web in 800 Clicks
NYC Nodejs - June 2017
A deep dive into Promises and an overview of a project developed using recursive promise chains and site crawling to get back to the starting site.
